B) Assembly of the flag

1. Position flat on a table the extrusions of the four sides to assemble the frame.
Insert the pole in the vertical hem of the flag by sliding it from the bottom of the hem.
2. Slide the horizontal pole in the top hem of the flag. Connect the 2 poles together at the corner.

C) Adjustment of the canvas and installation on the base

3. To adjust the flag tension, pull the elastic to stretch the canvas. To fix it, place the knot under the black plastic hook located at the bottom of the pole.
4. Take the flag and insert the pole on the chromed spike of the base.
This base allows the flag to rotate freely when there are drafts.
